

# John Developer

Software Engineer & Designer

john@example.com • [GitHub](#) • [LinkedIn](#)

## About Me

I'm a software engineer passionate about creating elegant solutions to complex problems. With expertise in full-stack development, I specialize in building scalable web applications and developer tools.

JavaScript code on a computer screen.

## Skills

### Languages

- TypeScript/JavaScript
- Python
- Rust
- Go

### Frameworks

- React/Next.js
- Node.js
- FastAPI
- Actix-web

### Tools

- Git/GitHub
- Docker
- PostgreSQL
- AWS/Vercel

## Projects

### Real-time Collaboration Platform

Web Application

Built a real-time collaborative document editing platform supporting 1000+ concurrent users.

**Technologies:** React, WebSocket, Redis, PostgreSQL

**Impact:** Reduced document sync latency by 75% compared to previous solution

### Machine Learning Pipeline

Data Science

Developed automated ML pipeline for processing and classifying large-scale datasets.

**Technologies:** Python, TensorFlow, Apache Airflow

#### Results:

- Processed 10M+ records daily
- Achieved 94% classification accuracy
- Reduced manual processing time by 80%

### Mobile Fitness Tracker

Mobile App

Cross-platform mobile app for tracking workouts and nutrition with 50K+ downloads.

**Technologies:** React Native, Firebase, GraphQL

#### Highlights:

- 4.8★ average rating
- Featured in App Store
- Active community of 10K+ users

## Experience

### Senior Software Engineer

TechCorp Inc. • 2021 - Present

- Led development of microservices architecture serving 1M+ users
- Mentored team of 5 junior developers
- Improved API response time by 60% through optimization

### Software Engineer

StartupXYZ • 2019 - 2021

- Built MVP that secured Series A funding
- Implemented CI/CD pipeline reducing deployment time by 80%
- Collaborated with design team on UI/UX improvements

### Junior Developer

WebDev Solutions • 2017 - 2019

- Developed client websites using modern frameworks
- Participated in code reviews and agile ceremonies
- Maintained legacy applications

## Education

### Master of Science in Computer Science

University of Technology • 2015 - 2017

### Bachelor of Science in Software Engineering

State University • 2011 - 2015

## Publications & Talks

- “Optimizing WebAssembly Performance for Browser Applications” - Web Performance Conference 2023
- “Building Scalable Real-time Systems” - DevCon 2022
- “Introduction to Rust for JavaScript Developers” - Local Meetup Series 2021

## Certifications

- AWS Certified Solutions Architect
- Google Cloud Professional Developer
- Certified Kubernetes Administrator (CKA)
